SUMMARY

Full-stack Web Developer experienced in building scalable applications using TypeScript, Golang, NestJS, Next.js, and Remix. Skilled in designing RESTful APIs with SQL and NoSQL, focused on performance optimization, clean architecture, and maintainable code.

EXPERIENCE

Fullstack Web Developer

PT ElNusa Petrofin TBK

February 2015—Present, Jakarta Selatan (Remote)

- Developed and maintained internal web applications supporting operational and risk management workflows for 10,000+ employees
- Built scalable backend services using NestJS, Prisma, and PostgreSQL, applying clean architecture and modular design principles
- Designed and implemented RESTful APIs, authentication, and multi-level role-based approval systems
- Developed responsive and maintainable frontend interfaces using Remix and Next.js with modern component libraries
- Implemented notification systems, data export features, and workflow automation to reduce manual operational tasks
- Collaborated with cross-functional teams in an Agile Scrum environment, participating in sprint planning, daily stand-ups, and QA processes

Fullstack Web Developer

PT Pupuk Sriwidjaja Palembang

August 2024—December 2025, Palembang

- Developed and maintained an internal Integrated Performance Management System (IPMS) supporting performance monitoring and decision-making
- Built scalable RESTful APIs using Golang (GoFiber) and Laravel, optimizing data access and processing
- Developed responsive and interactive front-end interfaces using Next.js for real-time data visualization
- Integrated Power BI dashboards to enhance system-level reporting and performance insights
- Designed and implemented secure authentication and access control to protect sensitive operational data

Mechanical Engineer (Intern)

PT Dexa Medica

July 2023—November 2023, Palembang

- Performed preventive maintenance and troubleshooting on pharmaceutical production machinery to ensure operational reliability
- Operated and monitored industrial equipment, supporting smooth and continuous production processes
- Assisted in PLC system inspections, basic diagnostics, and technical documentation

PROJECT

HSSE Online — Internal Risk Management System

PT ElNusa Petrofin TBK

- Developed a web-based risk management application with modular workflows, multi-level approval, and automated notifications
- Implemented RESTful APIs, role-based access control, and PDF export features using NestJS, Prisma, and Remix
- Built master data modules to manage core system entities such as users, roles, and risk categories
- Implemented end-to-end risk workflows (risk creation, hazard identification, and mitigation) integrated with object storage (MinIO) for hazard monitoring and traceability

Kepoin — Internal Knowledge Management Platform

PT ElNusa Petrofin TBK

- Built an internal knowledge-sharing platform supporting structured content creation and department-level access control
- Designed scalable backend logic and approval workflows using NestJS, Prisma, and Remix
- Designed and implemented the authentication features and landing page, owning the feature from development to deployment

EDUCATION

Super Bootcamp Sanbercode — Full-stack Web Developer (NestJS & Remix)

Remote · Scholarship Awardee (Top 2% of 850+ applicants) · Nov 2024 – Jan 2025

SMK Negeri 2 Palembang — Teknik Mekatronika

Palembang, Indonesia · Jul 2021 – May 2024

SKILLS

Programming Languages & Framework: Typescript, Javascript, Golang, PHP, Rust, ExpressJs, NestJs, NextJs, VueJs, RemixJs, React Router, Gin, GoFiber
Tool & Libraries : Figma, Linux, Git, Zustand, JWT, Midtrans, Prisma, Postgres, Mysql, MongoDB
Languages: English and Indonesian
